ORIGINAL

Acknowledgments

U.S. import statistics are compiled from information verified by Customs Import Specialists on import entries filed with Customs by importers. Under the direction of William von Raab, Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to field offices under the technical direction of the Duty Assessment Division.

EXPLANATION OF STATISTICS

Definitions of Customs Import Value: Beginning with 1982 statistics, the value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of the Tariff Act of 1930, as amended (most recently by the Trade Act of 1979), replaces the f.a.s. (free alongside ship) value in import reports. This Customs value is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. In the case of transactions between related parties, the relationship between buyer and seller should not influence the Customs value. In the case of overland shipments originating in Canada only, the Customs value generally does not include costs incurred in bringing the merchandise from the interior point of origin to the Canadian border point.

Fully Compiled and Estimated Shipments: Effective January 1985 statistics, the procedures used for the compilation and estimation of the value of U.S. import entries are divided into 2 categories. Full compilation is effected for items with values of $251 and over (Category I) and for items with values of $1001 and over (Category II). Estimates are made for items valued under $251[1] and under $1,001. Such Estimates are based on established ratios for individual countries and Included in the Schedule A section 9 (division 99, group 990, subgroup 990.0) totals shown in import reports.

Other: For detailed information on coverage, nonmonetary gold shipments, Foreign Trade Zone (FTZ) data, estimating procedures, types of imports, and related matters see the "Explanation of Statistics" section of Report FT135 and/or the "Guide to Foreign Statistics."

Symbols: X-Not applicable. Z-less than half of the unit of measurement shown.

[1]The factors are established by observation of the percentage relationship of the under $251 and under $1001 import transactions to individual country totals in past periods.
